DATE MAILED: 02/23/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/728,628

Applicant(s)

KRALLS ET AL.

Examiner

Ly T. TRAN

Art Unit

2853

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 12/5/03, 5/27/05.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claim 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Watanabe et al (EP 435276) in view of Lin (USPN 5,764,263).

With respect to claims 1, 12 and 22, Lin discloses an apparatus and a method of providing information on a backside of photographic media comprising:

- Inserting photographic media into a photographic printer (Column 9: line 61-67)
- Printing an image onto a frontside of the photographic media (fig.2: element 12, 14)
- Backprinting information onto a backside of the media by positioning a printhead in a printing position and directing ink from the printhead onto a backside of the media printhead is adapted to provide at least alphanumeric information on the backside of said media (Column 7: line 49-65, Fig.2: element 28, 29).

However, Lin fails to teach that the movable ink jet printhead which is movable between at least a printing position a priming position where the printhead is pressurized to force a stream of ink through discharge jets of the printhead, an enclosure, wiper pad, ink tray, absorbent material, rotating/pivoting device.

Watanable discloses:

- A movable ink jet printhead which is movable between at least a printing position a priming position where the printhead is pressurized to force a stream of ink through discharge jets of the printhead (fig.3, 4,8: element 8)
- An enclosure (fig.4: element 10) having an opening positioned so as to face the discharge jets of said printhead when said printhead is in said priming position, said enclosure being adapted to catch the stream of ink that is forced through the discharge jets of the printhead.
- a wiper pad (Fig.4: Element 13) is positioned at an end of a wall of said enclosure, said wiper pad being adapted to wipe a discharge jet end of said printhead (element 8) when said printhead moves from said priming position to said printing position so as to remove excess ink from said printhead (fig.8).
- a removable ink tray, wherein said printhead and said enclosure are mounted on said ink tray and said ink tray is movable between a non-operative position located partially outside of said printing apparatus and an operative positive located within said printing apparatus (element 10, Abstract).

- an absorbent material (fig.4: element 102) is provided on a surface of said ink tray and within said enclosure.
- wiper pad is formed from a material which has little or no loose fibers (Column 10: line 15-16).
- printhead is provided on a rotary moving device which is adapted to rotate the printhead between said printing position and said priming position/printhead is mounted on a pivoting device which is adapted to pivot said printhead between said printing position and said priming position (Fig.3,4: element 8, 9).
- rotary moving device has a center of rotation (element 9) which causes the printhead to translate away from media as soon as rotary motion of said printhead is initiated and pivoting device is adapted to cause the printhead to translate away from the media as soon as a pivoting motion of said printhead is initiated (fig.8: element 8, 9).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to move the print head to a priming position by rotating or pivoting mechanism and the movable ink tray as taught by Wanatable et al. The motivation of doing so is to easily replacable without the liability of introducing of the foreign matter or without the necessity for the high accuracy positioning, by which the stabilized and ensured recording operations are maintained with a simple structure and a t a low cost.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ly T. TRAN whose telephone number is 571-272-2155. The examiner can normally be reached on M-F (7:30am-5pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Meier can be reached on 571-272-2149. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
